LAWS/REGULATIONS INVOLVED

10 V.S.A., Chapter 151
(Act 250)

The Vermont Environmental Board hereby issues a Land Use Permit amendment #5W0483-3-EB pursuant to the authority vested in it in 10 V.S.A., Chapter 151. This permit amendment applies to the lands identified in the land records of East Montpelier, Vermont, as the subject of a deed to the Barre Granite Association, the "Permittee" as "grantee." This permit specifically authorizes the continued use of the existing lagoons for the processing of granite slurry, and the removal of approximately 4,000 cubic yards of dried granite fines from the East Montpelier facility for use as cover material at the Williamstown landfill. The project is located off Route 14 in East Montpelier, Vermont.

The Permittee, and its assigns and successors, are obligated by this permit to complete and maintain the project only as approved by the District 45 Environmental Commission in accordance with the terms and conditions of Land Use Permit #5W0483 and amendments, except as amended hereby, and Findings of Fact and Conclusions of Law #5W0483-3-EB.

CONDITIONS

1. Condition 8 is deleted and a new Condition 8 is added to read:

8. The Permittee's representative shall submit semi-annual written reports to the District Commission regarding its progress toward finding a long-term solution to its waste management problems. These reports must include detailed descriptions of the alternatives to burial of the granite fines, and what steps the permittee has taken toward pursuing these alternatives. The Commission reserves the right to schedule hearings and to impose further conditions with respect to waste disposal, as it deems necessary.

2. Condition 9 is deleted and a new Condition 9 is added to read:

9. Prior to the removal of dewatered granite fines off site, the Permittee shall provide to the District Commission written authorization for such removal and subsequent use of the removed fines from the Division of Waste Management, Department of Environmental Conservation, Agency of Natural Resources.

3. condition 10 is deleted and a new Condition 10 is added to read:

10. All construction on this project must be completed by October 1, 1988, **except** the construction within the enclosed and operating portion of the facility that is necessary to empty, fill, or service existing lagoons.

Dated at Montpelier, Vermont, this 27th day of March, 1989
